OBJECTIVE

Computer Science undergraduate graduating in 2027 with internship experience and academic project exposure in web application development, frontend technologies, backend integration, and database management. Familiar with HTML5, CSS3, JavaScript, React, Java, Python, SQL, MongoDB, and RESTful APIs. Interested in building responsive, accessible, and user-friendly applications, implementing data-driven features, debugging issues, and writing maintainable code. Seeking an opportunity to contribute to software development projects and grow through practical experience.

TECHNICAL SKILLS

Frontend Development: HTML5, CSS3, JavaScript, React, Responsive Web Design, UI Development
Backend Development: Node.js, Express.js, Java
Programming Languages: C, Java, Python, JavaScript, Object-Oriented Programming (OOP)
Databases: MySQL, MongoDB, SQL Queries, CRUD Operations, Database Integration, Data Management
Tools & Platforms: Visual Studio Code, Git, GitHub, Postman, MongoDB Compass
Development Practices: API Testing, Debugging, Software Testing Fundamentals, SDLC Fundamentals, Code Readability
Professional Skills: Problem-Solving, Analytical Thinking, Communication, Teamwork, Adaptability, Time Management

PROJECTS

SmartCampus – College Management Platform *React, Java, Spring Boot, MySQL*

- Developed a campus management application concept to organise student information and academic workflows.
- Worked on interface development, application logic, structured data management, backend integration, and API testing.
- Focused on usability, maintainability, and organising campus-related information in a structured manner.

College Event Portal *MERN Stack*

- Developed a web application for publishing college events and organising event-related information.
- Worked on event data management and application features for different college user roles, with a focus on usability and structured information.
- Explored full-stack application architecture and database-backed web development workflows.

Student Management System *Web Application*

- Created an academic project for organising student records and maintaining structured student information.
- Applied CRUD concepts, data organisation, and application development principles to student record management.

INTERNSHIP EXPERIENCE

MERN Stack Intern **Apr 2025 – Jun 2025**
Adhoc Company *3 Months*

- Gained practical exposure to React, Node.js, Express.js, and MongoDB in web application development.
- Practised component-based development, frontend and backend integration, database operations, debugging, and testing.
- Developed an understanding of application structure, version control workflows, and maintainable code practices.

HRM Intern **Apr 2025 – Jun 2025**
Ulearn Company *3 Months*

- Gained exposure to HR data management, digital documentation, and structured information workflows.
- Strengthened data accuracy, documentation, organisation, and professional communication skills.

EDUCATION

Aditya Degree College **2024 – 2027**
B.Sc. Computer Science *CGPA: 8.00*

Sri Chaitanya Junior College **2024**
Intermediate / Class XII *72.5%*

Sri Chaitanya International School **2022**
Secondary School / Class X *75%*

CERTIFICATIONS

Digital Marketing • Python Essential • First React Website • Introduction to Cloud Computing • Git Versions

HACKATHONS & PROFESSIONAL DEVELOPMENT

Participated in two hackathons focused on Web Development and Cybersecurity. Interested in frontend engineering, responsive interfaces, REST API integration, database-driven applications, continuous learning, and collaborative software development.
